A proficient medical technologist with a diverse background in hematology, coagulation, chemistry, urinalysis and blood banking for clinical inpatient and reference outpatient laboratories for major medical facilities.

A team-oriented professional with excellent problem-solving and decision-making skills who sets priorities well in a fast-paced environment.

EXPERIENCE

Ocean Medical Center, San Pedro, California

2002-2007

Senior Medical Technologist (2005-2007)

Performed laboratory tests for an outpatient facility that served 25 medical groups, an HMO and an AIDS clinic.

- Ran daily quality control materials that validated accuracy and reliability of patient test results.
- Cleaned and maintained instruments with responsibility for mechanical function assessment and parts replacement.
- Greeted patients and collected demographics and billing information for input into the computer system.
- Interpreted physician orders for test selection and determined coding for tracking of charges and volume.

Senior Medical Technologist, Critical Care Laboratory (2002-2005)

Provided laboratory services for the operating rooms, two adult critical care units and a pediatric intensive care service for a leading 1,200-bed medical center.

- Served on the liver transplant team and participated in 15 surgeries with responsibility for patient coagulation analysis.
- Performed stat tests in hematology, coagulation and chemistry for a satellite lab.
- Conducted parallel testing of new reagents/controls for quality monitoring.
- Wrote and revised procedures for test methodologies.

Methodist Hospital of Southern California, Arcadia, California

2000-2001

Medical Technologist

Worked per diem throughout all areas of the laboratory on all three shifts as needed for a 300-bed community hospital.

St. Luke's Hospital and Health Center, Tarzana, California

1996-2000

Medical Technologist II

Held a day shift laboratory position in a 500-bed acute-care hospital. Performed tests in chemistry/urinalysis and hematology/coagulation. Rotated through blood bank, immunochemistry and microbiology.

Page Two

St. Luke's Hospital and Health Center, Continued

- Served as an instructor for medical technology students and new employees in phlebotomy and on the bench.
- Presented up to four technical lectures on subjects related to cell identification and enzyme kinetics.
- Trained and mentored 50 medical technologist students.
- Volunteered for heart screening programs, community health fairs and annual National Medical Laboratory Week events.

Marlboro Cancer Institute, Los Angeles, California

1990-1996

Medical Technologist, Blood Bank

Responsible for routine blood banking in addition to the collection, preparation and distribution of blood components for a cancer research center that is affiliated with Harvard Medical School.

- Monitored patient responses to platelet, red blood cell and white blood cell transfusions.
- Screened prospective donors and performed plateletpheresis and granulopheresis.
- Assisted in the recruitment of donors through community lectures at service organizations.
- Created and developed a slide show presentation on the blood donation process for a medical staff meeting.
- Provided technical support for state association continuing education training workshops in blood banking.
- Conducted tours for the media, VIPs, school groups and community members in support of foundation efforts and recognition for research.

EDUCATION

Los Angeles Hospital School of Medical Technology, Los Angeles, California

Medical Technology Internship

University of California, Los Angeles, Los Angeles, California

Bachelor of Science, Medical Technology, Graduated *Summa cum Laude*

Southern University, Torrance, California

Took courses in Biomedical Engineering.
