A self-motivated registered nurse with more than ten years of progressive experience in clinical services, infection control and community education.

ACCOMPLISHMENTS

- Initiated the National Nosocomial Surveillance System "IDEAS" computer program as the hospital's computer database for statistical reporting of risk stratified and device associated infection rates.
- Participated on a continuous quality improvement team that reduced the rate of needlestick exposures to healthcare workers by 63%.
- Developed and presented community outreach in-service programs on infection control topics including AIDS, hepatitis and tuberculosis.
- Assisted in the planning and presentation of five annual AIDS seminars with responsibility for expert speakers and vendor sponsorship to educate the healthcare worker on global HIV issues.

PROFESSIONAL EXPERIENCE

Los Angeles Hospital, Los Angeles, California 1998-Present

Infection Control Nurse (2008-Present)

Responsible for all aspects of the surveillance, prevention and control of infections for a 532-bed, acute-care medical center.

- Prepare and conduct educational in-services for orientation, annual updates and selected infection control topics.
- Collect and analyze statistical data and prepare and present reports to committees.
- Act as a resource for staff, patients, families and the community in regards to infection control problems and issues.

Charge Nurse (2003-2008)

Oversaw a 41-bed medical-surgical unit with specialties in neurosurgery and urology.

Staff Nurse (1998-2003)

Provided direct patient care on a medical-surgical service.
